Good Day:

I have major concerns regarding the proposed development in the Mugar Wetlands.

In East Arlington the **flooding** is already a major problem and is increasing with each rain event. I live at 80 Margaret St. which abuts the bike path. There is now a "pond" of standing water in my neighbor's backyard. We've had 3 basement floods in the past 2 months. My entire backyard is mushy with water. We have RAW SEWAGE coming up into the sump pump pit.

The Developer must comply with the request to install/monitor wells at the appropriate location. And they must provide assurances flood mitigation will be part of the plan. OTHERWISE, it's a NO GO.
